

Square Roots (Multiplication/Division)

What is a square root?

The **opposite** of squaring a number is square rooting a number.

EXAMPLE:

Square the number 5 to get 25 $5^2 = 25$
Square root the number 25 to get 5 $\sqrt{25} = 5$

To find the square root to a number, just ask yourself:
What number do I need to square to get this number?
